PRODUCT INFORMATION
ACE MG-6 is a superior formulation of magnesium designed to rapidly cure and/or prevent magnesium deficiencies in crops, ornamentals and turf. ACE MG-6’s acetate-based technology provides an extremely efficient, available and safe nutrient delivery system. ACE MG-6 has a low salt index which reduces the potential of a foliage burn. The addition of 1 to 2 quarts of POWER PAK S0-20 or our SRN 30-0-0 or SRN 28-0-0 per 100 gallons of water aids in leaf absorption and translocation.

**Caution: A jar test is recommended to test compatibility when new or unfamiliar tank mix combinations are used. When used as directed this product does not supply all the nutrients required by plants and is designed to supplement a soil fertility plan.**
